1 Brief Resume

2018: **CNRS Senior Research Director (DR1)**

2012-: **Professeure Chargée de Cours à l'Ecole Polytechnique, temps partiel**

2012-2016: **Membre du Comité National CNRS, Section 02**

2012: **CNRS Senior Research Director 2 (DR2)** CPHT Ecole Polytechnique, France

2010: **Qualification Professeure d'Université** Obtenue en France

2006-2011: **Associate professor**, Yale University, USA

2005-2006: **Associate (tenured) professor**, Université de Sherbrooke, Quebec, Canada

2004-present: Membre du Canadian Institute for Advanced Research (CIFAR)

2002-2005: **Assistant professor**, Université de Sherbrooke, Quebec, Canada

2000-2002: **position Maître-Assistante** (6 années), Genève, groupe de M. Büttiker

1998-2000: **Post-Doctoral Fellow** E.T.H Zürich, group of T. M. Rice

Oct. 1998: **PhD**, Theoretical Physics, LPS Orsay, advisor Bernard Coqblin

Théorie des Systèmes Kondo en basses dimensions

Mention Très Honorable avec Félicitations du Jury

1995: DEA de Physique Théorique, ENS Paris, directeurs E. Brézin et J. Iliopoulos (Mention Bien).

1994: Maitrise, Nantes, cursus general (Mention Bien) et approfondissement physique des solides (institut Matériaux IMN Jean Rouxel).

2 Scientific Profile

In my research, I aim to answer fundamental questions in pluri-disciplinary areas engaging condensed matter, quantum optics and cold atomic systems, many-body quantum systems, nanoelectronics, quantum information theory and quantum field theory.

108 publications, 1 book chapter (and 7 reviews), H-index 32, 2833 citations (web of science).
Google scholar gives: H-index 38 and 4024 citations.

Participation in a Popular Book on Quantum Mechanics, *Le Plus Grand des Hasards*, Editors Jean-Francois Dars and Anne-Marie Papillaut, 2010, 65 authors

3 Books and Surveys

- *Driven dissipative dynamics and topology of quantum impurity systems*, Karyn Le Hur, Loïc Henriët, Loïc Herviou, Kirill Plekhanov, Alexandru Petrescu, Tal Goren, Marco Schiro, Christophe Mora, Peter P. Orth, arXiv:1702.05135, submitted to C. R. Physique, 39 pages.
- *Many-Body Quantum Electrodynamics Networks: Non-Equilibrium Condensed Matter Physics with Light*, Karyn Le Hur, Loïc Henriët, Alexandru Petrescu, Kirill Plekhanov, Guillaume Roux, Marco Schiró, arXiv:1505.00167, C. R. Physique **17** (2016) 808-835. [arXiv gives 42 citations and Google Scholar 35]
- *Entanglement Entropy, decoherence, quantum phase transition of a dissipative two-level system*, Karyn Le Hur, Annals of Physics **323**, 2208-2240 (2008) (34 pages). [arXiv 67 citations, 103 citations Google scholar]
- *Superconductivity close to the Mott state: From condensed-matter systems to Superfluidity in optical lattices*, K. Le Hur and T. Maurice Rice, review article, Annals of Physics **324**, 1452-1515 (2009), Special Issue July, arXiv:0812.1581, 98 pages [73 citations arXiv and 101 citations Google Scholar]
- Book on *Understanding Quantum Phase Transitions*, editor L. D. Carr Taylor and Francis, Boca Raton, 2010
Chapter on *Quantum Phase Transitions in Spin-Boson Systems: Dissipation and Light phenomena*, by Karyn Le Hur (26 pages, also accessible at arXiv:09094822)
- Survey on *Effective Equilibrium Theory in NonEquilibrium Quantum Transport*, by Prasenjit Dutt, Jens Koch, J. Han and Karyn Le Hur, arXiv:1101.1526, 53 pages Annals of Physics **326** 2963-2999 (2011) [21 citations].
- *Correlated Topological Phases and Exotic Magnetism with Ultracold Fermions* Peter P. Orth, Daniel Cocks, Stephan Rachel, Michael Buchhold, Karyn Le Hur, Walter Hofstetter, arXiv:1212.5607
Contribution to J. Phys. B special issue on non-Abelian gauge fields, J. Phys. B: At. Mol. Opt. Phys. **46** (2013) 134004. [26 citations] and D. Cocks *et al.* Phys. Rev. Lett. **109**, 205303 (2012) (56 citations).
- *Non-perturbative stochastic method for driven spin-boson model* Peter P. Orth, Adilet Imambekov, Karyn Le Hur Phys. Rev. B **87**, 014305 (2013). [54 citations]
See also Loïc Henriët, Zoran Ristivojevic, Peter P. Orth, Karyn Le Hur, Phys. Rev. A **90**, 023820 (2014). [35 citations]

4 5 Selected Articles

- *Topological Insulators and Mott physics from the Hubbard Interaction*, Stephan Rachel and Karyn Le Hur, Phys. Rev. B **82**, 075106 (2010). [176 citations]
Quantum Spin Hall with interactions and lattice anisotropy, W. Wu, S. Rachel, W. M. Liu and K. Le Hur, Phys. Rev. B **85** 205102 (2012) [96 citations].
- *Time-reversal symmetry breaking in circuit-QED based photon lattices*, Jens Koch, Andrew Houck, Karyn Le Hur and S. M. Girvin, Phys. Rev. A **82**, 043811 (2010) [161 citations].
See also Viewpoint: Andrew D. Greentree and Andrew M. Martin Physics **3**, 85 (2010).

Jens Koch and Karyn Le Hur, Phys. Rev. A **80**, 023811 (2009) [104 citations].
A. Petrescu, A. Houck, and K. Le Hur, Phys. Rev. A **86**, 053804 (2012) [50 citations].

- *Interaction Effects in a Quantum RC Circuit*,
Christophe Mora and Karyn Le Hur, *Nature Physics*, **6** 697 (2010) - 71 citations

- *Bipartite Fluctuations as a Probe of Many-Body Entanglement* [96 citations]
H. Francis Song, Stephan Rachel, Christian Flindt, Israel Klich, Nicolas Laflorencie,
Karyn Le Hur, arXiv:1109.1001, 30 pages+25 pages Supplementary Material
Phys. Rev. B **85**, 035409 (2012), Editors' Suggestion.

- *Charge fractionalization in Quantum Wires* [100 citations]
Hadar Steinberg, Gilad Barak, Amir Yacoby, Loren N. Pfeiffer, Ken W. West,
Bertrand I. Halperin and Karyn Le Hur, *Nature Physics* **4**, 116 (2008).

5 Complete Publication List/Only Published articles

Publications 2018

- *Engineering Quantum Spin Liquids and Many-Body Majorana States with a Driven Superconducting Box Circuit*,
Fan Yang, Loïc Henriët, Ariane Soret, Karyn Le Hur, arXiv:1801.05698, submitted to PRL
- *Emergent Chiral Spin State in the Mott Phase of a Bosonic Kane-Mele-Hubbard Model*, Kirill Plekhanov, Ivana Vasic, Alexandru Petrescu, Rajbir Nirwan, Guillaume Roux, Walter Hofstetter, Karyn Le Hur, arXiv:1707.07037, accepted for publication in PRL.
- *Driven dissipative dynamics and topology of quantum impurity systems* Karyn Le Hur, Loïc Henriët, Loïc Herviou, Kirill Plekhanov, Alexandru Petrescu, Tal Goren, Marco Schiro, Christophe Mora, Peter P. Orth, 39 pages, arXiv:1702.05135; submitted and almost accepted to Comptes Rendus Académie des Sciences, special issue on Quantum Simulators, coordinated by Laurent Sanchez-Palencia.
- *Topological Zak Phase in Strongly-Coupled LC Circuits*
Tal Goren, Kirill Plekhanov, Félicien Appas, Karyn Le Hur, Phys. Rev. B RC **97**, 041106 (2018).
- *Ramsey Interferometry of Particle-Hole Pairs in Tunnel Junctions*
Tal Goren, Karyn Le Hur, Eric Akkermans, to be re-submitted to PRB (after PRL). arXiv:1611.06738.

Publications 2017

- *Majorana Spin Liquids, Topology and Superconductivity in Ladders*
Karyn Le Hur, Ariane Soret, Fan Yang, Phys. Rev. B **96**, 205109 (2017).
- *Bipartite charge fluctuations in one-dimensional Z_2 superconductors and insulators*
Loïc Herviou, Christophe Mora, Karyn Le Hur, Phys. Rev. B **96**, 121113 (2017).
- *Precursor of Laughlin state of hard core bosons on a two leg ladder* Alexandru Petrescu, Marie Piraud, Guillaume Roux, I. P. McCulloch, Karyn Le Hur, Phys. Rev. B **96**, 014524 (2017).
- *Topology of a dissipative spin: dynamical Chern number, bath induced non-adiabaticity and a quantum dynamo effect* Loïc Henriët, Antonio Sclocchi, Peter P. Orth, Karyn Le Hur, Phys. Rev. B **95**, 054307 (2017).

- *Floquet Engineering of Haldane Chern Insulators and Chiral bosonic phase transitions*, Kirill Plekhanov, Guillaume Roux, Karyn Le Hur Phys. Rev. B **95**, 045102 (2017).

Publications 2016

- *Many-terminal Majorana island: from Topological to Multi-Channel Kondo Model* Loïc Herviou, Karyn Le Hur, Christophe Mora Phys. Rev. B **94**, 235102 (2016).
- *Triplet FFLO Superconductivity in the doped Kitaev-Heisenberg Honeycomb Model*, Tianhan Liu, Cécile Repellin, Benoît Douçot, Nicolas Regnault, Karyn Le Hur, Phys. Rev. B **94**, 180506 (2016).
- *Many-Body Quantum Electrodynamics Networks: Non-Equilibrium Condensed Matter Physics with Light*, Karyn Le Hur, Loïc Henriët, Alexandru Petrescu, Kirill Plekhanov, Guillaume Roux, Marco Schiró, arXiv:1505.00167, C. R. Physique **17** (2016) 808-835.
- *Realizing Topological Mott Insulators from the RKKY Interaction*, Tianhan Liu, Benoît Douçot, Karyn Le Hur Phys. Rev. B **93**, 195153 (2016).
- *Phase Diagram and Entanglement of two interacting topological Kitaev chains* Loïc Herviou, Christophe Mora, Karyn Le Hur, Phys. Rev. B **93**, 165142 (2016), 24 pages.
- *Entanglement structure of the two-channel Kondo model* Bedoor Alkurtass, Abolfazl Bayat, Ian Affleck, Sougato Bose, Henrik Johannesson, Pasquale Sodano, Erik S. Sorensen, Karyn Le Hur, Phys. Rev. B **93**, 081106 (2016).
- *Quantum sweeps, synchronization, and Kibble-Zurek physics in dissipative quantum spin systems*, Loïc Henriët, Karyn Le Hur, Phys. Rev. B **93**, 064411 (2016) (24 pages).

Publications 2015

- *A Quantum Electrodynamics Kondo Circuit with Orbital and Spin Entanglement* Guang-Wei Deng, Loïc Henriët, Da Wei, Shu-Xiao Li, Hai-Ou Li, Gang Cao, Ming Xiao, Guang-Can Guo, Marco Schiro, Karyn Le Hur, Guo-Ping Guo, arXiv:1509.06141 [*not accepted in PRX, 9 citations*].
- *Condensed-matter physics: Quantum dots and the Kondo effect*, Karyn Le Hur, Nature **526**, 203204 (2015). News and Views on articles by experiments at Marcoussis (Z. Iftikhar et al. Nature 526, 233-236 (2015)) and Stanford (A. J. Keller et al. Nature 526, 237-240 (2015)).
- *Electrical Current from Quantum Vacuum Fluctuations in Nano-engines* Loïc Henriët, Andrew N. Jordan, Karyn Le Hur, Phys. Rev. B **92**, 125306 (2015).
- *Topological Superconductivity in Two Dimensions with Mixed Chirality* A. M. Black-Schaffer, K. Le Hur, Phys. Rev. B **92**, 140503(R) (2015).
- *Chiral Mott Insulators, Meissner Effect, and Laughlin States in Quantum Ladders* Alexandru Petrescu, Karyn Le Hur, Phys. Rev. B **91**, 054520 (2015).
- *Chiral Bosonic Phases on the Haldane Honeycomb Lattice*, Ivana Vasic, Alexandru Petrescu, Karyn Le Hur, Walter Hofstetter, Phys. Rev. B **91**, 094502 Published 3 March 2015 - Editors Suggestion

Publications 2014

- *Chiral d-wave superconductivity on the honeycomb lattice close to the Mott state*, Annica M. Black-Schaffer, Wei Wu, Karyn Le Hur, Phys. Rev. B **90**, 054521 (2014).
- *Fluctuations and Entanglement spectrum in quantum Hall states*, Alexandru Petrescu, H. Francis Song, Stephan Rachel, Zoran Ristivojevic, Christian Flindt, Nicolas Laflorencie, Israel Klich, Nicolas Regnault, Karyn Le Hur, J. Stat. Mech. (2014)

P10005.

- *Quantum Dynamics of the Driven and Dissipative Rabi Model*,
Loïc Henriët, Zoran Ristivojevic, Peter P. Orth, Karyn Le Hur, Phys. Rev. A **90**, 023820 (2014).
- *Tunable Hybrid Quantum Electrodynamics from Non-Linear Electron Transport*,
Marco Schiró, Karyn Le Hur, Phys. Rev. B **89**, 195127 (2014).

Publications 2013

- *Anisotropic Quantum Spin Hall Effect, Spin-Orbital Textures and Mott Transition*,
Tianhan Liu, Benoît Douçot, Karyn Le Hur Phys. Rev. B **88**, 245119 (2013), 24 pages
- *Strongly-Correlated Thermoelectric Transport beyond Linear Response*,
Prasenjit Dutt and Karyn Le Hur Phys. Rev. B **88**, 235133 (2013).
- *Bosonic Mott Insulator with Meissner Currents*,
Alexandru Petrescu, Karyn Le Hur Phys. Rev. Lett. **111**, 150601 (2013).
- *Admittance of the $SU(2)$ and $SU(4)$ Anderson quantum RC circuits*,
Michele Filippone, Karyn Le Hur, Christophe Mora, Phys. Rev. B **88**, 045302 (2013).
- *Strongly correlated dynamics in multichannel quantum RC circuits*,
Prasenjit Dutt, Thomas Schmidt, Christophe Mora, Karyn Le Hur Phys. Rev. B **87**, 155134 (2013).
- *Correlated Dirac particles and Superconductivity on the Honeycomb Lattice*,
Wei Wu, Michael M. Scherer, Carsten Honerkamp, Karyn Le Hur, Phys. Rev. B **87**, 094521 (2013) [12 pages]
- *Correlated Topological Phases and Exotic Magnetism with Ultracold Fermions*
Peter P. Orth, Daniel Cocks, Stephan Rachel, Michael Buchhold, Karyn Le Hur, Walter Hofstetter, J. Phys. B: At. Mol. Opt. Phys. **46** (2013) 134004 (topical review)
- *Low Frequency Admittance as a Probe of Majorana Fermions*
Christophe Mora, Karyn Le Hur Phys. Rev. B **88**, 241302 (2013).
- *Non-equilibrium Quantum Transport through a dissipative resonant level model*
Chung-Hou Chung, Karyn Le Hur, Gleb Finkelstein, Matthias Vojta, Peter Woelfle, Phys. Rev. B **87**, 245310 (2013).
- *Non-perturbative stochastic method for driven spin-boson model*
Peter P. Orth, Adilet Imambekov, Karyn Le Hur Phys. Rev. B **87**, 014305 (2013).
- *Scaling of Entanglement Entropy across Lifshitz transitions*,
Marlon Rodney, H. Francis Song, Sung-Sik Lee, Karyn Le Hur, Erik Sorensen, Phys. Rev. B **87**, 115132 (2013).

Publications 2012

- *Kondo resonance of a microwave photon*
Karyn Le Hur, Phys. Rev. B **85** 140506 (2012).
- *Bipartite Fluctuations as a Probe of Many-Body Entanglement* H. Francis Song, Stephan Rachel, Christian Flindt, Israel Klich, Nicolas Laflorencie, Karyn Le Hur, arXiv:1109.1001, 30 pages+25 pages Supplementary Material
Phys. Rev. B **85**, 035409 (2012), Editors' Suggestion
- *Quantum Spin Hall Insulators with Interactions and Lattice Anisotropy*, Wei Wu, Stephan Rachel, Wu-Ming Liu and Karyn Le Hur, arXiv:1106.0943 and published Phys. Rev. B **85**, 205102 (2012).
- *Anomalous Hall Effects of Light and Chiral Edge Modes on the Kagome Lattice*

Alexandru Petrescu, Andrew Houck, Karyn Le Hur, Phys. Rev. A **86**, 053804 (2012).

- *Time-reversal invariant Hofstadter-Hubbard model with Ultracold Fermions* Daniel Cocks, Peter P. Orth, Stephan Rachel, Michael Buchhold, Karyn Le Hur, Walter Hofstetter, Phys. Rev. Lett. **109**, 205303 (2012)
- *Detecting Quantum Critical Points using Bipartite Fluctuations*, Stephan Rachel, Nicolas Laflorencie, H. Francis Song, Karyn Le Hur, Phys. Rev. Lett. **108**, 116401 (2012)
- *Heisenberg Uncertainty Principle as a Probe of Entanglement Entropy: Application to Super-radiant Quantum Phase Transitions* Pierre Nataf, Mehmet Dogan, Karyn Le Hur Phys. Rev. A **86**, 043807 (2012)
- *Noninvasive Probes of Charge Fractionalization in Quantum Spin-Hall Insulators*, Ion Garate and Karyn Le Hur, Phys. Rev. B **85**, 195465 (2012)
- *d-wave superfluid with Gapless Edges in a Cold Atom Trap*, Anne-Louise Gadsbølle, H. Francis Song, Karyn Le Hur, Phys. Rev. A **85**, 051603(R) (2012).

Publications 2011

- *Effective Equilibrium Theory in NonEquilibrium Quantum Transport*, by Prasenjit Dutt, Jens Koch, J. Han and Karyn Le Hur, arXiv:1101.1526, 53 pages Annals of Physics **326** 2963-2999 (2011).
- *Giant Charge Relaxation Resistance in the Anderson Model*, Michele Filippone, Karyn Le Hur and Christophe Mora, Phys. Rev. Lett. **107**, 176601 (2011).
- *Entanglement Entropy of the Two-Dimensional Heisenberg Antiferromagnet*, H. Francis Song, Nicolas Laflorencie, Stephan Rachel, Karyn Le Hur, Phys. Rev. B **83**, 224410 (2011).
- *Entanglement from Charge Statistics: Exact Relations for Many-Body Systems*, H. Francis Song, Christian Flindt, Stephan Rachel, Israel Klich, Karyn Le Hur, Phys. Rev. B **83**, 161408(R) (2011).
- *Designing Heterostructures with Higher Temperature Superconductivity*, Karyn Le Hur, Chung-Hou Chung, I. Paul, Phys. Rev. B **84**, 024526 (2011).
- *Effective Thermodynamics of a coupled Two-level system*, N. S. Williams, K. Le Hur and A. Jordan, J. Phys. A: Math. Theor. **44** (2011) 385003.

Publications 2010

- *Time-reversal symmetry breaking in circuit-QED based photon lattices*, Jens Koch, Andrew Houck, Karyn Le Hur and S. M. Girvin, Phys. Rev. A **82**, 043811 (2010).
- See also Viewpoint: Andrew D. Greentree and Andrew M. Martin Physics **3**, 85 (2010).
- *Dynamics, Synchronization and Quantum Phase Transitions of Two Dissipative Spins*, Peter P. Orth, David Roosen, Walter Hofstetter and Karyn Le Hur, Phys. Rev. B **82**, 144423 (2010) (Editors' Suggestion).
 - *Topological Insulators and Mott physics from the Hubbard Interaction*, Stephan Rachel and Karyn Le Hur, Phys. Rev. B **82**, 075106 (2010).
 - *Tunable Kondo-Luttinger systems far from equilibrium*, C.-H. Chung, K.V.P. Latha, K. Le Hur, M. Vojta and P. Wölfle, Phys. Rev. B **82**, 115325 (2010).
 - *General Relation between Entanglement and Fluctuations in One Dimension*, Francis Song, Stephan Rachel and Karyn Le Hur, Phys. Rev. B **82**, 012405 (2010).
 - *Universal Resistances of the Quantum RC circuit*, Christophe Mora and Karyn Le Hur, *Nature Physics*, **6** 697 (2010).
 - *Universality in dissipative Landau-Zener transitions*, Peter P. Orth, Adilet Imambekov and Karyn Le Hur, Phys. Rev. A **82**, 032118 (2010).

- *Electric field Tuned Dimensional Crossover in Ar-Irradiated SrTiO₃*, J. H. Ngai, Y. Segal, F. J. Walker, S. Ismail-Beigi, K. Le Hur and C. H. Ahn, Phys. Rev. B **81**, 241307(R) (2010).

Publications 2009

- *Theory of non-equilibrium transport in the SU(N) Kondo regime*, Christophe Mora, Pavel Vitushinsky, Xavier Leyronas, Aashish A. Clerk, Karyn Le Hur, arXiv:0906.2791, 17 pages. Phys. Rev. B **80**, 155322 (2009) (Editors' suggestion).
- *Superfluid-Mott Insulator Transition of Light in the Jaynes-Cummings Lattice*, Jens Koch and Karyn Le Hur, Phys. Rev. A **80**, 023811 (2009), 13 pages.
- *Supersolidity of Cold Atomic Bose-Fermi mixtures in optical lattices*, P. P. Orth, D. L. Bergman, and K. Le Hur, Phys. Rev. A **80**, 023624 (2009).
- *Topological Zero modes in fermionic condensate phases on the honeycomb lattice*, Doron Bergman and Karyn Le Hur, Phys. Rev. B **79**, 184520 (2009) [25 pages]
- *Non-equilibrium transport at a dissipative quantum phase transition*, Chung-Hou Chung, Karyn Le Hur, Matthias Vojta, Peter Wölfle, Phys. Rev. Lett. **102**, 216803 (2009).
- *Entanglement, decoherence, and dynamics of a two-state system*, Karyn Le Hur Proceedings of PQE conference 2009, Snowbird, to appear in Journal of Modern Optics.

Publications 2008

- *Charge fractionalization in Quantum Wires*, Hadar Steinberg, Gilad Barak, Amir Yacoby, Loren N. Pfeiffer, Ken W. West, Bert Halperin, Karyn Le Hur, Nature Physics **4**, 116 (2008).
- *Charge Fractionalization in nonchiral Luttinger systems*, K. Le Hur, B. I. Halperin, A. Yacoby, Annals of Physics **323**, 3037-3058 (2008).
- *Shot noise in SU(N) Quantum Dot Kondo effects*, P. Vitushinsky, A. A. Clerk, and K. Le Hur, Phys. Rev. Lett. **100**, 036603 (2008).
- *Discontinuous current-phase relations in small 1D Josephson junction arrays*, Jens Koch and Karyn Le Hur, Phys. Rev. Lett. **101**, 097007 (2008).
- *Dissipative Quantum Ising model in a cold atomic spin-boson mixture*, Peter P. Orth, Ivan Stanic, Karyn Le Hur, Phys. Rev. A **77**, 051601 (2008).
- *Double-gap superconducting proximity effect in nanotubes*, Karyn Le Hur, Smitha Vishveshwara, Cristina Bena, Phys. Rev B **77**, 041406(R) (2008).
- *Entanglement Entropy, decoherence, quantum phase transition of a dissipative two-level system*, Karyn Le Hur, Annals of Physics **323**, 2208-2240 (2008) (34 pages).

Publications 2007

- *Entanglement and Criticality in Quantum Impurity Systems*, K. Le Hur, Ph. Doucet-Beaupré, W. Hofstetter, Phys. Rev. Lett. **99**, 126801 (2007).
- *Universal and Measurable entanglement entropy in the spin-boson model*, Angela Kopp and Karyn Le Hur, Phys. Rev. Lett. **98**, 220401 (2007) - General section.
- *Transport through a quantum dot with SU(4) entanglement*, K. Le Hur, P. Simon, D. Loss, Phys. Rev. B **75**, 035332 (2007).
- *Heavy fermion solution for electrons Hund's coupled to a spin liquid*, Karyn Le Hur, Phys. Rev B **75**, 014435 (2007).

Publications 2006

- *The electron lifetime in Luttinger liquids*,

Karyn Le Hur, Phys. Rev B **74**, 165104 (2006).

- *Coulomb drag between two spin incoherent Luttinger liquids*,

Greg Fiete, Karyn Le Hur, Leon Balents, Phys. Rev. B **73**, 165104 (2006).

- *A Mesoscopic Resonating Valence Bond system on a triple dot*,

K. Le Hur, Patrik Recher, Émilie Dupont, Daniel Loss, Phys. Rev. Lett. **96**, 106803 (2006).

- *Decoherence of Einstein-Podolsky-Rosen pairs in a noisy Andreev entangler*,

Émilie Dupont and Karyn Le Hur, Phys. Rev. B **73**, 045325 (2006).

Publications 2005

- *Transport in a Spin-Incoherent Luttinger liquid*,

Greg Fiete, Karyn Le Hur and Leon Balents, Phys. Rev. B **72**, 125416 (2005).

- *Dephasing of Mesoscopic Interferences from Electron Fractionalization*,

Karyn Le Hur, Phys. Rev. Lett. **95**, 076801 (2005).

- *Hidden Caldeira-Leggett dissipation in a Bose-Fermi Kondo model*,

Mei-Rong Li, Karyn Le Hur and Walter Hofstetter, Phys. Rev. Lett. **95**, 086406 (2005).

- *Unification of electromagnetic noise and Luttinger liquid via a resonant level*,

Karyn Le Hur and Meirong Li, Phys. Rev. B **72**, 073305 (2005).

- *Probing spin and orbital Kondo effects with a mesoscopic interferometer*,

Rosa Lopez, David Sanchez, Minchul Lee, Mahn-Soo Choi, Pascal Simon, Karyn Le Hur, Phys. Rev. B **71**, 115312 (2005).

- *Quantum Dot in the pseudogap Kondo state*,

J. Hopkinson, K. Le Hur, and É. Dupont, Eur. Phys. J. B **48**, 429-432 (Letter) (2005).

Publications 2004

- *On the double-dot charge qubit and transport via dissipative cotunneling*,

Meirong Li and Karyn Le Hur, Phys. Rev. Lett. **93**, 176802 (2004).

- *Coulomb blockade of a noisy metallic box: A realization of Bose-Fermi Kondo models*,

Karyn Le Hur, Phys. Rev. Lett. **92**, 196804 (2004).

- *From nodal liquid to nodal Mottness in a frustrated Hubbard model*,

J. Hopkinson and K. Le Hur, Phys. Rev. B **69**, 245105 (2004).

- *Maximized Orbital and Spin Kondo effects in a single-electron Transistor*,

K. Le Hur, P. Simon, and L. Borda, Phys. Rev. B **69**, 045326 (2004).

Publications 2003

- *Smearing of charge fluctuations in a grain by spin-flip assisted tunneling*,

Karyn Le Hur and Pascal Simon, Phys. Rev. B **67**, 201308R (2003).

- *Fractional plateaus in the Coulomb blockade of coupled quantum dots*,

Karyn Le Hur, Phys. Rev. B **67**, 125311 (2003).

Publications 2002

- *Capacitance of a quantum dot from the channel-anisotropic two-channel Kondo model*, Karyn Le Hur and Georg Seelig, Phys. Rev. B **65**, 165338 (2002).

- *Electron fractionalization induced dephasing in Luttinger liquids*,

Karyn Le Hur, Phys. Rev. B **65**, 233314 (2002).

Publications 2001

- *Andreev Scattering in ladders with preformed pairs: Similitudes to high- T_c cuprates*,

- Karyn Le Hur, Phys. Rev. B **64**, R060502 (2001).
- *Zeeman smearing of the Coulomb-Kondo staircase*,
Karyn Le Hur, Phys. Rev. B **64**, R161302 (2001).
 - *Weakly-coupled Hubbard chains at half-filling and Confinement*,
Karyn Le Hur, Phys. Rev. B **63**, 165110 (2001).

Publications 2000

- *Successive opening of the Fermi surface in doped N-leg Hubbard ladders*,
U. Ledermann, K. Le Hur and T.M. Rice, Phys. Rev. B **62**, 16383 (2000).
- *Phases of the two-band model of spinless fermions in one dimension*,
Urs Ledermann and Karyn le Hur, Phys. Rev. B **61**, 2497 (2000).
- *Metal-Kondo insulating transitions and transport in one dimension*,

6 Research Overview

We have divided our Research in *4 subjects*: Phenomena in Quantum Matter; Theory of Non-Equilibrium Quantum Systems and Applications; Many-Body Physics with Atoms and Light;

Quantum Information.

Phenomena in Quantum Matter

I am interested in exotic phases of matter such as Topological Insulators, Mott physics, Superfluidity, Superconductivity, Luttinger liquids and Heavy-fermion systems applying field-theory methods and Renormalization Group arguments. With T. Maurice Rice (ETH Zuerich), we have written a review on the Hubbard model close to the Mott state, in relation to the emergence of high- T_c superconductivity, and based on the PhD work by Urs Ledermann (Zuerich 1999). We have done efforts in order to provide a Green's function calculation in the underdoped phase based on a microscopic ladder approach. With Chung-Hou Chung (Taiwan and Yale) and Indranil Paul (CNRS, Grenoble and Paris), we have also made some predictions to increase T_c in bi-layer systems (with one layer providing the large magnetic super-exchange and one layer providing the charge carriers). I am also interested in novel topological quantum systems (topological insulators). With Stephan Rachel, and also with Wei Wu and Wu-Ming Liu, we have made progress to understand the interplay between Mott physics and the Kane-Mele model on the honeycomb lattice. In collaboration with G. Fiete and L. Balents at KITP Santa-Barbara and separately with B. Halperin and A. Yacoby at Harvard, we have made progress in our understanding of excitations in low-dimensional conductors. Following a work by P. Ghaemi and F. Wilczek, with Doron Bergman, we have also studied the emergence of Majorana fermions in superconducting graphene; a Majorana fermion is a fermion which is its own anti-particle. Heavy fermions correspond to electron systems having effective masses that are several hundred times the electron mass; we have studied the intriguing heavy-fermion character of LiV_2O_4 .

Theory of Non-equilibrium Quantum Systems and Applications

With the advent of highly tunable strongly correlated systems at the nanoscale, it has not only become possible to systematically realize and investigate well-studied theoretical models but also to pose new theoretical questions of fundamental nature. We have studied low-energy models with a large emergent symmetry and have predicted novel quantum phase transitions. Though non-equilibrium physics in itself has a long history, a lot remains to be unfolded in the context of strongly correlated quantum systems. In fact, the understanding of strongly correlated quantum systems far from equilibrium is one of the outstanding open questions in condensed-matter physics. Many of the theoretical approaches that have been proven so successful in treating strong correlations are inadequate once the system is driven out of equilibrium. Recently, we have worked on approaches to tackle non-equilibrium quantum systems away from equilibrium:

Many-Body physics with Atoms and Light

Optical lattices provide an “ideal” way of realizing in experimental practice theoretical models which are fundamental to many-body physics and possess quantum phase transitions¹. These crystals made of light are used to trap cold atoms at very low temperatures and the ultra-cold atoms tunnel quantum-mechanically between lattice sites just as single or paired electrons (Cooper pairs) tunnel through the periodic potential wells created by positive ions in crystalline

Zoller, Annals of Physics (N.Y.) **315**, 52-79 (2005), Special Issue; *Superconductivity close to the Mott state: From condensed-matter systems to superfluidity in optical lattices*, Karyn Le Hur and T. Maurice Rice, arXiv:0812.1581 (98 pages) and Annals of Physics (N.Y.) **324**, 1452 (2009), Special Issue.

materials. Because dynamics and correlations can now be investigated quantitatively, relevant questions are also emerging, in many cases demanding deeper theoretical understanding. Over the last few years there has also been tremendous activity in studying the coherent interaction of matter and light². These developments offer a wealth of possibilities, at the interface between quantum optics and condensed-matter. The light field serves not only as a probe of the many-body system, but may also support interesting cavity mediated phenomena and phases. We explore novel phenomena in optical lattices and circuit Quantum Electrodynamics (QED).

Quantum Information:

In the last few years it has become evident that quantum information may lead to further insight

²For recent surveys: *Manipulating quantum entanglement with atoms and photons in a cavity*, J. M. Raimond, M. Brune, and S. Haroche, Rev. Mod. Phys. **73**, 565 (2001); *Wiring up quantum systems*, R. J. Schoelkopf and S. M. Girvin, Nature (London) **451**, 664 (2008).

into other areas of physics as statistical mechanics and quantum field theory. The attention of the quantum information community to systems intensively studied in condensed matter has stimulated an exciting cross-fertilization between the two areas. Methods developed in quantum information has proved to be extremely useful in the analysis of many-body systems. A central task of quantum information theory is to characterize and quantify the entanglement of multiparticle systems; quantum entanglement is a quantum mechanical phenomenon in which the quantum states of two or more objects have to be described with reference to each other, even though the individual objects may be spatially separated. Recently, we have introduced the concept of “bipartite fluctuations” as a probe of many-body physics, quantum phase transitions and entanglement in quantum systems. Understanding entanglement between a qubit (spin) and its environment also constitutes an important class of problems; any realization of a quantum computer has a dissipative environment which is entangled, to some extent with the qubits.

7 Contributions to the training of highly-qualified Personnel

PhD students:

- **Fan Yang** (CPHT Ecole Polytechnique)

I am supervising the PhD thesis of Fan Yang on topological phases since 2017. Fan is funded by the German DFG for a project on Artificial Gauge Fields and Topological Phases. See the web site for further information: <https://www.for2414.de/>. Fan has already published one paper from her M1 project and one paper from her M2 project has been submitted.

- **Ariane Soret** (CPHT Ecole Polytechnique and Technion Israel)

Since Fall 2016, I am co-supervising the PhD thesis of Ariane Soret with E. Akkermans on

superconductivity, mesoscopic and interaction effects. Ariane is funded by ENS Cachan, and is presently working on a Casimir mesoscopic effect and generalizing arguments from the book by Eric and Gilles Montambaux to fluctuations in Casimir-like geometries comprising plaques. Ariane was also involved in some projects on Majorana fermions with Fan, when she was at the M2 level.

- **Kirill Plekhanov** (CPHT Ecole Polytechnique and LPTMS Orsay) (2015-2018)

Since 2015, I am co-supervising Kirill Plekhanov with Guillaume Roux (LPTMS Orsay) on Floquet theory and artificial gauge fields, topological phases. Kirill has 6 papers, he has obtained several post-doctoral offers and has decided to join Basel for Fall 2018, in the group of Jelena Klinovaja and Daniel Loss.

- **Loic Henriet** (CPHT Ecole Polytechnique) (2013-2016)

I have been supervising the PhD student Loic Henriet on Non-Equilibrium Quantum Systems and Light-Matter Interaction. Loic is now a post-doctoral associate at Barcelona in the group of D. Chang. His PhD thesis is accessible at <https://hal.archives-ouvertes.fr/tel-01525432v1>. Loic Henriet has also written a book on Quantum Mechanics for students at Classes Préparatoires during his PhD, with his mother Anne Henriet Scavennec

<https://www.amazon.fr/Physique-Quantique-Statistique-Exercices-Documents/dp/2340011299>

- **Loic Herviou** (CPHT Ecole Polytechnique and Laboratoire Pierre Aigrin, ENS Paris) (2014-2017)

I have co-supervised Loic Herviou together with Christophe Mora (LPA ENS) on Majorana fermions in condensed-matter systems. Loic is now post-doctoral fellow at Stockholm in the group of J. Bardarson. His PhD thesis is accessible at

<https://hal.archives-ouvertes.fr/tel-01620158>

- **Tudor Alexandru Petrescu** (Yale/Ecole Polytechnique -graduation September 2015)

I have supervised Alex Petrescu in the area of topological insulators in cold atoms and novel phases of light at Yale University and then at CPHT Ecole Polytechnique. The PhD thesis of Alex is accessible at <https://hal.archives-ouvertes.fr/tel-01208205>. Alex has obtained a 3-year postdoctoral position in the group of Hakan Tureci at Princeton, and has recently obtained another advanced post-doctoral fellowship from Sherbrooke University for Fall 2018.

- **Tianhan Liu** (LPTHE Jussieu/CPHT Ecole Polytechnique - graduation September 2015)

Since Summer 2012, I am co-supervising Tianhan Liu with Benoît Douçot (LPTHE Lussieu) on interacting topological phases of matter. Tianhan has obtained a 4-year post-doctoral position in the group of D. Kovrizhin at Cambridge and then Oxford.

- **Prasenjit Dutt** (PhD student at Yale, graduation August 2013)

I have been supervising Prasenjit Dutt in the area of non-equilibrium Quantum Transport in Nanosystems. Prasenjit has accepted a position in mathematical finance at UBS Stamford (USA).

- **Peter Orth** (graduation, Yale 2011)

I have supervised Peter Orth in the area of cold-atomic systems, Quantum Computation, Novel phases and Quantum Phase Transitions since September 2006. Peter has successfully graduated in April 2011, and he has been a postdoctoral Fellow at Karlsruhe (Germany), a Junior Group leader in the group of J. Schmalian. He moved to U. Minnesota at Minneapolis and is now assistant professor at Ames Lab, Iowa in USA.

- **Francis Song** (graduation 2012, Yale)

I have supervised the PhD student Francis Song in the area of quantum computing, many-body entanglement, and Density matrix Renormalization Group (DMRG). Francis was a post-doctoral fellow at New-York University with X. -J. Wang in Theoretical Neuroscience. Francis

is now working for Deep Mind in London on Artificial Intelligence.

- **Émilie Dupont** (graduation 2006 - Sherbrooke)

I have supervised Émilie Dupont in the area of Mesoscopic physics, Entanglement, and Quantum Computing. Émilie has obtained positions of ATER at the Université Pierre and Marie Curie, Jussieu (Paris, France), at U. Cergy Pontoise and in Caen. Emilie is now a Science Teacher at Cit scolaire Marcel Gambier, Le Havre Area, France.

- **Michel Pioro-Ladrière** (graduation, 2005, Sherbrooke)

I have supervised Michel Pioro-Ladrière in co-direction with Andy Sachrajda (NRC Ottawa) in the field of Nanoelectronics and Quantum Computation. Michel has done both theory and experiments. Michel has been a postdoctoral fellow with Tarucha in Japan. In 2006, Michel received the price of the best PhD thesis at Sherbrooke in Science and Engineering.

Michel became my successor (professor) at Sherbrooke university.

- **Georg Seelig** (co-direction with Prof. Markus Büttiker, 2000/2002, Geneva)

I have supervised Georg Seelig on strongly-correlated electron problems at the mesoscopic scale, and we have written a paper together on this topics (Physical Review B **65**, 165338 (2002)). Georg went to Bell Labs with Kostya Matveev, and then Georg was a postdoctoral fellow at Caltech working in bio-physics with E. Winfree for a few years. He is now Assistant Professor at University of Washington Seattle.

- **Urs Ledermann** (co-direction with Prof. T.M. Rice in Zürich, 1998/2000)

I co-supervised the PhD Thesis of Urs Ledermann, “Hubbard models and Superconductivity”.

- **Wei Wu** (visiting PhD student from Academy of Sciences in China, Beijing)

2011, I have been supervising the PhD student Wei Wu on Hubbard models and Cluster Dynamical Mean Field Theory. Wei has a post-doctoral fellow at Sherbrooke University in the group of André-Marie Tremblay. He is now a post-doctoral fellow with Antoine Georges and Michel Ferrero.

- **Anne-Louise Gadsballe** (Sep 2010-Jan. 2011)

I have supervised the visiting PhD student **Anne-Louise Gadsballe** from Aarhus (Denmark) on D-wave superfluidity of cold atomic fermion systems.

- I have been collaborating with **Michele Filippone**, PhD student in the group of Christophe Mora (LPA ENS Paris). M. Filippone then has joined the group of P. Brouwer at Freie University Berlin for a post-doc, and then the group of T. Giamarchi in Geneva. I have also collaborated with **Bedoor Alkurtass** in the group of Sougato Bose in UC London. I have also collaborated with **Cécile Repellin** (LPA ENS paris and Princeton) in the group of Nicolas Regnault when she was a PhD student. Cécile is presently at MIT with a Marie-Curie Fellowship. I have collaborated with **Pierre Nataf** at the end of his PhD with Cristiano Ciuti at Paris Diderot.

Postdoctoral research fellows:

- **Tal Goren** (Ecole Polytechnique 2016-2018)

Tal has done in PhD in Israel at Technion in the group of Eric Akkermans, on novel time-dependent protocols to probe electron systems, such as Ramsey protocols. We have collaborated on this subject during her PhD, and Tal is now a post-doctoral fellow in our group working on topological systems in CQED. Tal is funded by Ecole Polytechnique and PALM.

- **Zoran Ristivojevic** (2012-2014 CPHT Ecole Polytechnique, now CNRS Toulouse)

I have been collaborating with Zoran Ristivojevic and Loic Henriët on quantum impurity sys-

tems out of equilibrium (see list of publications). In 2013-2014, Zoran was funded by Ecole Polytechnique and by a post-doctoral fellowship of the Labex Palm, Paris-Saclay. He obtained a permanent CNRS position at Toulouse.

• **Ion Garate** (post-doctoral fellow at Yale and now assistant professor at Sherbrooke)

I have been collaborating with Ion Garate (Yale post-doc, assistant professor at Sherbrooke University) on the theory of quantum RC circuit with interactions and topological insulators. In 2018, we continue our collaboration through the supervision of a Master student Vivien Perrin from ENS Cachan.

• **Thomas Schmidt** (Yale 2011, now assistant professor at university of Luxembourg)

I have been collaborating with the postdoctoral fellow, Thomas Schmidt (group of my colleague Prof. Leonid Glazman at Yale and now Junior Group Leader at Basel) in the area of quantum impurity systems, mesoscopic systems and cold atoms. Thomas has obtained an Assistant Professor position at University of Luxembourg.

• **Stephan Rachel** (Oct. 2009-2012 Yale, now professor at Melbourne Australia)

Stephan Rachel has obtained a prestigious DFG postdoctoral fellowship from Germany and has chosen to come to Yale under my supervision. Stephan and I have been working in the area of Dirac fermions, topological insulators and topological qubits, and cold-atomic realizations. Stephan was a senior associate at TU Dresden in the group of Matthias Vojta, and he spent a period at Princeton, collaboration with A. Bernevig, before joining Melbourne (Australia) as a permanent Faculty Position in 2017.

• **Jens Koch** (Yale, now Professor at Northwestern university)

I have collaborated with the postdoctoral fellow Jens Koch (group of my colleague Prof. Steve Girvin) in the area of Josephson junction arrays and novel correlated many-body phenomena when coupling photons to atoms.

• **Doron Bergman** (Yale, 2007-2009)

I have supervised the postdoctoral fellow Doron Bergman (PhD in Santa-Barbara with Prof. Leon Balents) in the area of topological zero modes in superconductors and Dirac models, cold atomic systems and high- T_c superconductors. Doron has accepted a position in Big-Data Management, at Tachyus, San Francisco.

• **Adilet Imambekov** (Yale, assistant professor at Rice University until July 2012)

I have been collaborating with Adilet Imambekov in the area of non-equilibrium spin dynamics applied to cold atomic systems. Adilet from Kazakhstan did his PhD at Harvard with Eugene Demler, then was a postdoctoral fellow at Yale (group of my colleague Prof. Leonid Glazman) and then obtained a Faculty Position at Rice University. Adilet tragically died in the mountain in an expedition (<http://physicstoday.scitation.org/doi/10.1063/PT.4.1676/full/>) and it is a big loss for all of us (Adilet was brilliant, talented for sport and very kind). We continue to work on our collaborative stochastic project (PhD thesis of Peter Orth, Yale 2011 and PhD thesis of Loïc Henriët, CPHT 2016), that we developed based on a pioneer paper by Adilet and colleagues before his PhD (G. Lesovik, A. V. Lebedev, A. O. Imambekov <https://link.springer.com/article/10.1134/1.1494045>).

• **Pavel Vitushinsky, Sherbrooke**

I have co-supervised the postdoctoral fellow Pavel Vitushinsky (co-direction with Prof. A. Clerk, McGill) in the area of novel phenomena in nanosystems and non-equilibrium transport.

• **Andriy Nevidomskyy** (2005/2006 Sherbrooke, now associate professor at Rice University)

I have supervised Andriy Nevidomskyy on mesoscopic physics at Sherbrooke. Andriy is now associate professor at Rice University.

• **Mei-Rong Li** (2002/2005 Sherbrooke)

I have supervised Mei-Rong Li on mesoscopic physics and more precisely on noisy quantum dots. Mei-Rong obtained an offer for a tenure track position from Hofstra University (New-York) but declined it and she is working in Mathematical Finance in Canada.

• **John Hopkinson** (2002/2004 Sherbrooke)

I have supervised John Hopkinson – PhD student from Rutgers (Piers Coleman) – on the areas high- T_c superconductors, and mesoscopic physics for two years. John then received a prestigious NSERC fellowship and decided to continue his research experience in Toronto with Hae-Young Kee, on frustrated magnetism. John was at Brandon University, Canada as an Associate Professor and he is now an instructor at UBC British Columbia, Vancouver.

Visiting Scholars:

Profs. Eric Akkermans (2017) and Andrew Jordan (2018) have obtained invited professor positions from Ecole Polytechnique. Ion Garate (Sherbrooke) has visited us Fall 2016 at Ecole Polytechnique. Summer 2014: I hosted Prof. Henrik Johannesson (U. Goteborg, Sweden) and Prof. Andrew Jordan (U. of Rochester USA). I have been collaborating with the assistant professor C.-H. Chung (Taiwan); he took a sabbatical leave (Aug 2009-Jan 2010) in my group at Yale.

Other supervisions and collaborations with postdocs:

Also, I collaborate with post-docs at other institutions: **Greg Fiete** (KITP Santa-Barbara and now associate professor at the University of Texas at Austin), **Angela Kopp** (Rutgers University, now working at D. E. Shaw Research in New-York), **Cristina Bena** (IPHT Saclay), **Patrik Recher** (PhD Bale, postdoc at Stanford, then Emmy Noether position at Wurzburg and now professor at Braunschweig), **Marco Schiro** (Princeton, now CNRS IPHT Saclay), **Ivana Vidanovic Vasic** (Frankfurt, now professor in Serbia), **Albolfazl Bayat** (UC London), **Marie Piraud** (Munich).

8 Training of intermediate-qualified students

• **2018:** Current Supervision of

Andrea Pizzi (M2 student, Ecole Polytechnique Turin and Paris-Saclay, complex systems, ranked 1st 18,7/20), internship funded by Labex PALM. We have written a PHD project for Andrea at PALM and are currently writing an official PhD proposal at ED-PIF, before May 2018.

Vivien Perrin (M2 ENS Paris quantum physics ranked first 18,1/20 M2 ENS Paris quantum physics, third year of ENS Cachan).

2018-2019 Collaboration with Prof. Ion Garate at Sherbrooke University for the 4th year of ENS Cachan of Vivien. This is a collaboration CNRS-LIA, Ecole Polytechnique, Sherbrooke and CIFAR in Canada. The CIFAR program on quantum materials, with directors Louis Taillefer (Sherbrooke) and Leon Balents (KITP Santa-Barbara) must be renewed Fall 2018 (<https://www.cifar.ca/research/quantum-materials/>).

Peng Cheng (M1 student at Ecole Polytechnique, high-energy physics). Funding Labex PALM.

• **2016-2017:** Supervision of the third year student at Ecole Polytechnique, **Felicien Appas**. Felicien has published a paper with us, and is now continuing in experimental quantum physics at Paris Diderot, in parallel to his M2 program. He is applying for a PhD in experimental quantum optics with Sarah Ducci at Paris Diderot.

• **2015-2017:** I have been supervising the Master students **Antonio Sclocchi** (Turin, Paris-Saclay), **Mme Fan Yang** (Master Ecole Polytechnique), and **Thilina Arachige** (co-supervision with Julien Laurat, ENS). Mme Fan Yang has continued at the M2 level in our group, and then she started a PhD with us, fall 2017. Antonio continues in statistical physics and he is now doing a PhD at LPTMS with S. Franz. T. Arachige is doing a PhD in Germany at Turbingen.

• **Kirill Plekhanov, M2 student from Master M2 ICFP**

I have been supervising Kirill Plekhanov, on Dirac Materials and Floquet Topological Insulators. Kirill has applied for a PhD Fellowship from EDPIF to continue at the PhD level, in co-direction with Guillaume Roux (LPTMS Orsay).

• **Loic Herviou, M2 student at Ecole Polytechnique**

I have co-supervised the Master student Loic Herviou on Majorana Fermions, Superconducting Wires in Cavities, with my colleague Christophe Mora (LPA ENS Paris). Loic has pursued at the PhD level, and Loic is now post-doctoral fellow at Stockholm.

• **Loic Henriet, M2 student at Ecole Polytechnique**

I have supervised the Master Student M2 Loic Henriet, Ecole Polytechnique, on driven and dissipative quantum impurity models, January-April 2013. Loic has pursued at the PhD level with us and is now post-doctoral fellow at Barcelona.

• **Alexis Jouan, M2 student (CPHT Ecole Polytechnique)**

I have co-supervised the Master student M2 Alexis Jouan, LPA ENS Paris, with Christophe Mora on Majorana fermions in cavity QuantumElectrodynamics environment, Winter 2013. Alexis has done a PhD thesis with Jérôme Lesueur at ESPCI.

• **Dragos Potirniche (CPHT Ecole Polytechnique)**

I have supervised the undergraduate student Dragos Potirniche, Princeton, Summer 2012. Dragos is now PhD student at Berkeley.

• **Sachin Pathak (CPHT Ecole Polytechnique)**

I have supervised the undergraduate student from Bangalore, Sachin Pathak, on QED cavity systems.

• **Mehmet Dogan (Yale)**

I have supervised the second year Master student **Mehmet Dogan** at Yale on many-body physics with photons and atoms. Mehmet has done a PhD thesis in the group of S. Ismail-Beighi on ab-initio calculations, graduation 2017. We have written a paper together with Pierre Nataf.

• **Ivan Stanic (Masters student, Yale)**

I have supervised the student Ivan Stanic in the area of graphene (2007-2009).

• **Daliang Li (Yale)**

I have supervised the first-year student **Daliang Li** at Yale during the summer 2010. Daliang was a PhD student in the group of Prof. W. Skiba at Yale in high-energy physics, and is now post-doctoral fellow at John Hopkins.

• **Jean-Francois Rupprecht (Master project 2010 Yale)**

I have supervised the Master student **Jean-Francois Rupprecht** from ENS Paris (Feb-July 2010) on bilayer graphene systems, scattering theory and Berry phase. Jean-Francois has written a Master Thesis on this subject and was a PhD student at LPTMC UPMC with O. Benichou, R. Voituriez. He was a post-doctoral fellow at ENS Paris with L. Bocquet and is now in Singapore with Jacques Prost.

• **Sean Litsey (Yale 2009-2010)**

I have supervised the Senior student **Sean Litsey** on the intriguing phenomenon of ripples in graphene. Sean was a PhD student at UCLA and is now Applied Machine Learning Data

Scientist.

- **Raphael Jeanneret** (Master project 2009 Yale)

I have supervised the Master student **Raphael Jeanneret** from ENS Lyon for a summer project on graphene systems, Dirac fermions, and Applications. Raphael was continued in biophysics, soft matter and hydrodynamics and is now a post-doctoral fellow at Balearic Islands.

- **summer students** (2007)

I have supervised the first-year PhD students **Michael Kastoryano** and **Joseph Bae** at Yale. Michael has done his PhD at Copenhagen with M. Wolff and is now an assistant professor at Cologne working on quantum information theory.

- **Philippe Doucet-Beaupré** (COOP student 2004/2007, Sherbrooke)

I have supervised the Bachelor student **Philippe Doucet-Beaupré** on the application of the Wilson Renormalization Group (NRG) approach to the spin-boson model (or Caldeira-Leggett model). He has built a trustable and powerful Numerical Renormalization Group method. We have written a Physical Review Letter together and Philippe is now a PhD student at University of Urbana Champaign USA.

- **Louis Gaudreau** (COOP student 2002/2005, Sherbrooke)

I have supervised the Bachelor student **Louis Gaudreau** during his 3 COOP training courses in the area of Quantum Computing. Louis Gaudreau was a Master student in my group, hired in co-direction with A. Sachrajda at NRC Ottawa. Louis has done a PhD at NRC Ottawa, and then followed an international path in Munich and Barcelona, and is now back as a scientist in NRC Ottawa.

9 Teaching

X Spring 2015, 2016, 2017, 2018	: Petites Classes, PHY311 : Introduction to quantum mechanics.
X Fall 2014, 2015, 2016, 2017	: Petites Classes, PHY430, quantum mechanics.
X Spring 2013-2014	: Petites Classes, PHY432 : quantum mechanics and statistical physics. :
Yale Fall 2011	: Graduate course on Statistical Physics , 628a
Yale 2008-09 and 10-11	: Two Undergrad. courses 440 and 441, : Quantum Mechanics & Natural Phenomena .
Yale spring 2007-08	: Graduate Course : on Advanced Many-Body theory (634 and 632).
Yale, Fall 2007	: Undergraduate Lab : on Modern Physics Measurement (205/206). :
Sherbrooke 2006	: Undergraduate Course on : Statistical Physics to second year students.
Sherbrooke 2003-2006	: Advanced Course on : Mesoscopic physics to Master and PhD students : (course introduced by myself).
Sherbrooke 2002-2006	: Undergraduate Course : on ElectroMagnetism to first year students, Course. :
Genève 2000-2002	: Undergraduate Electrodynamics to second year students, : assistant Mme Ruth Durrer.
ETH Zurich 2000	: Teaching Assistant and Organization of Proseminars : on Diagrammatic Techniques (ETH).
1995-1998 Cergy-Pontoise (PhD level)	: Undergraduate course to 1 st year students : Introduction to special relativity , 2 Small Classes.

10 Invitations and Organization of Conferences

Organization of International Conferences and Workshops:

September 2015: Participation in the organization of a workshop at ICPT Trieste on “Frustration, Dynamics, Many-Body Localization” with A. Scardicchio, S. Parameswaran, R. Moessner, M. Mueller

April 2014: Participation in the organization of an OSA Incubator Meeting in Washington on “Topological Order with Photons” with S. Girvin, M. Hafezi, J. Taylor

January 2012: Co-organizer of the Aspen Winter conference on “New Directions in Cold Atoms” with E. Altman, E. Demler, M. Greiner, W. Ketterle and C. Sa DeMelo

March 2010: Chair of the APS invited session on “Novel Probes of electron interactions in low-dimensional systems” with C. Ford, L. Glazman, N. Mason, D. Mirlin, S. Cronin

July 2009: Organization of a 2-week Summer School in Cargèse, Corsica, France on condensed-matter physics with A. Jagannathan, L. Greene and C. Pépin

<http://icamconferences.org/cargese09/>

March 2009: Organization of a symposium with J. Harris at the APS meeting 2009 on *persistent currents in mesoscopic rings*, Pittsburg

May 2008: Organization of a 2-week Workshop on, *Quantum Information and Phenomena: From mesoscopic to cold-atomic systems*, with I. Cirac, D. Loss and P. Zoller (ICTP Trieste), <http://cdsagenda5.ictp.trieste.it/>

March 2006: Invited talk at APS meeting, Baltimore (speakers: J. Petta, K. Matveev, H. Steinberg, G. Fiete, K. Le Hur and Chairman: L. Balents) and organization of the symposium

July 2004: Organization of a Workshop in Cargèse, Corsica, France on condensed-matter physics with A. Kapitulnik, D. Morr and C. Pépin

March 2004: Invited talk at APS meeting, Montreal, on SU(4) Kondo confinements and organization of the symposium (Chairman: L. Glazman)

Selected Invitations (International Events) until 2013 (need to be updated):

September 2013: Invitation at Harvard, workshop in memory of our friend Adilet Imambekov, organized by D. Abanin, E. Demler, L. Glazman.

September 2013: 4 Lectures of 1h30 on Quantum Dynamics of Spin-Boson Systems at the Quebec Mesoscopic School, organized by M. Aprilli, J. Gabelli, B. Reulet.

September 2013: Workshop in Memory of my PhD advisor Bernard Coqblin in LPS Orsay

July 2013: Invited Presentation at MPIPKS Dresden, Workshop on Spin-Orbit Entanglement and Topological Phases organized by R. Thomale, B. Trauzettel, S. Trebst.

June-July 2013: Invitation Cargèse, Workshop on Topological Phases in condensed-matter and Cold Atoms: application to quantum computing, organized by Eddy Ardonne, Didier Poilblanc, Matthias Troyer, Nicolas Regnault.

May 2013: Invitation Trieste, Workshop on Ultracold Atoms and Gauge Theories, organized by J. Dalibard, M. Lewenstein, G. Mussardo, C. Sa de Melo, A. Trombettoni

January 2013: Workshop at Stockholm on Pushing the Boundaries of Ultracold Atoms

October 2012: Invitation KITP Santa-Barbara, Workshop on Non-Equilibrium Quantum Physics

August 2012: Invitation for a seminar at Les Houches, school on non-equilibrium quantum systems organized by T. Giamarchi, A. Millis, O. Parcollet, H. Saleur

June 2012: Seminar at IHP, Workshop on disordered systems organized by B. Altshuler, B. Douçot, M. Mézard, G. Shlyapnikov

March 2012: Invitation to APS meeting in Boston

March 2012: 70th Birthday of P. Woelfle in Karlsruhe

Feb. 2012: Invitation in Aspen, *Conference on Low-Dimensional Systems*

October 2011: Workshop on Charge and heat dynamics in nano-systems October 10-12, 2011, Orsay, France organized by C. Bena and A. Crépieux.

Sept 2011: Participation in the Yale-UCL meeting in London on NanoTechnology

Aug 2011: Participation in the Aspen Workshop on Topological Quantum Systems

June 2011: Invitation at MPIPKS Dresden, Workshop on *New Directions in Quantum Impurity Systems*

Sept 2010: Invitation at Nordita, Stockholm, Workshop on *Quantum Matter in Low Dimensions: Opportunities and Challenges*

Aug 2010: Invitation at Konstanz, School and Workshop on *Spin-Based Quantum Computing*, organized by G. Burkard and D. Loss

July-Aug. 2010: Invitation Aspen, Workshop on *Low-dimensional Systems*, organized by E. Altman, L. Glazman, P. Goldbart, and G. Refael

July 2010: Invitation MPIPKS Dresden, Workshop on *Low-dimensional Systems*, organized by J. Meyer, G. Refael and K. Stengel

June 2010: Invitation, MPIPKS Dresden, Workshop on *Quantum Information Concepts for Condensed Matter Problems*, organized by I. Affleck, M. Haque and U. Schollwöck

May 2010: Invitation at Perimeter Institute, workshop on Emergence and Entanglement, organized by A. Hamma, N. Turok, D. Gottesman, S. Sachdev and X.-G. Wen

Spring 2010: CNRS Fellowship and Visiting Scholar at Orsay, Paris

Oct-Nov. 2009: Visiting scholar, KITP Santa-Barbara, Workshop on Quantum Information

June 2009: Invited Professor at École Normale Supérieure of Paris (1 month)

Feb. 2009: Invitation, KITP Santa-Barbara, conference on *New Directions in Low-dimensional Electron Systems*

Jan. 2009: Invited presentation at the PQE conference 2009, Snowbird

July 2008: Invitation, Boulder summer school, 3 lectures on Condensed Matter Physics

June 2008: Invitation to MPIPKS Dresden, Workshop on *Novel Phases of matter and Phase Transitions*, organized by A. Chubukov, M. Vojta and T. Vojta

March 2008: International Conference, Moriond, Les Arcs, on *Transport in NanoSystems*
http://www.cnano-rhone-alpes.org/IMG/pdf_moriond-program.pdf

Sept. 2007: Invited Talk, Workshop at Brookhaven organized by A. Tsvelik, F. Essler, and R. Konik, on *Quantum Field Theory applied to condensed-matter systems*

Aug. 2007: Invited Talk at MPIPKS Dresden, Workshop on *Quantum Impurity Systems*, organized by R. Bulla, D. Logan, and A. Schiller

June 2007: Invited Talk, ICTP Trieste, Workshop on Nanosystems and Graphene, organized by V. Falko, J. Meyer and A. Millis

July 2006: Aspen, Workshop on Mesoscopic Physics organized by M. Devoret, S. Girvin, L. Glazman and C. Marcus

June 2006: CEA Saclay (Paris), Claude Itzykson memorial on *Strongly Correlated Electrons* organized by C. Pépin and O. Parcollet

June 2006: Gordon conference on Strongly Correlated Electrons. Session on Quantum Phase Transitions by S. Chakravarty (speakers: C. Nayak, M. Fisher, L. Balents, K. Le Hur)

April 2005: KITP Santa-Barbara, Workshop on Quantum Criticality, organized by P. Coleman, A. Chubukov, D. Morr, M. Norman. Lecture on “Quantum Criticality at the Nano-Scale”

Nov 2004: Invited professor at Saclay for 2 months by the condensed matter group of SPHT

Sept. 2004: Gordon Conference on Superconductivity, Oxford, organized by Seamus Davis and Van der Marel. Invited talk on *Exotic Superconductivity*

July 2004: Trieste, Workshop on Strongly Correlated Electrons and Mesoscopic Physics, Invited Presentation

Sept. 2003: Brookhaven, workshop on “Field Theory Methods applied to Mesoscopic Physics” organized by A. Tsvelik and F. Essler

April 2003: Workshop at MPIPKS Dresden; seminar on SU(4) Kondo confinements

July 2002: Trieste, Invitation, Workshop on Correlated Electron Systems organized by P. Coleman, A. Tsvelik and A. Chubukov

March 2000: European Physics Society meeting in Montreux, Switzerland. Talk on LiV_2O_4

June 1999: 60th birthday of T.M. Rice in Ascona, Switzerland. Seminar on LiV_2O_4

April 1999: Cambridge, Invitation, Workshop on Correlated Electron Phenomena

11 Administrative Task and Other

- 2012-2016: Member of the Comité National, CNRS, Section 02 and Member of Bureau
- Spring 2013: Participation in the selection committee of CNRS Directeurs de Recherche (DR02), Section 03
- Participation ERC Panel PE2 consolidator grant 2015, 2017
- Participation ANR Panel 2018
- January 2013: Participation in AERES committee, visit of LPTMC UPMC UMR 7600, and HCERES committee 2018 (President).
- Member of the CIFAR (Canadian Institute for Advanced Research) program on Quantum Materials
- Member of the Editorial Board of Physical Review B, since 2012
- Referee of Physical Review Journals, Europhysics Journals, Nature and Nature Physics, ...
- Referee for grants from ANR, NSF, DOE, NSERC, DFG...
- Participation in the promotion process to assistant, associate and full professors, of colleagues in my field of expertise.
- Participation in PhD and HDR Jurys.

12 Funding and Awards

Ecole Polytechnique, since 2012

- DFG German Fellowship, Forschungsgruppe, related to the creation of a new unit on Artificial Gauge Fields and Topological Phases, gathering Munich (I. Bloch, speaker), Hamburg, Frankfurt, Dresden, Barcelona, Cambridge and Ecole Polytechnique. Fellowship for 1 PhD student, Mme Fan Yang.
- Grant from LABEX PALM, Paris-Saclay and Ecole Polytechnique Quantum, Post-doctoral Funding, 2016-2018, Mme Tal Goren
- Grant from LABEX PALM, Paris-Saclay Quantum Dynamics in Many-Body Quantum Systems, Post-doctoral Funding, 2013-2014
- Post-doctoral Fellowship from Ecole Polytechnique 2012-2013, Zoran Ristivojevic
- PhD funding for PhD students from Ecole Polytechnique and ED-PIF, and ENS Cachan (Loic Henriet, Loic Herviou, Kirill Plekhanov, Ariane Soret).
- Prime d'Encadrement et de Recherches obtenue en 2015 au CNRS pour 4 ans.

Yale (July 2006-2012):

- NSF grant (National Science Foundation) Condensed Matter and Material Theory (CMMT), 2008
NSF DMR-0803200, 9/1/08
Karyn Le Hur, *Theory of Entanglement in Many-Body Quantum Systems*
<http://www.nsf.gov/funding/>
- DOE grant (Department of Energy), 2011

DOE award: Renewal DE-FG02-08ER46541

Karyn Le Hur, *Nonequilibrium Dynamics of Many-Body Quantum Systems: Fundamentals and New Frontiers*

<http://www.energy.gov/>

- NSF MRSEC: Material Research Center, 2011 (approved)

PIs: C. Ahn and others

- NSF grant, ITR Center: Yale Center for Quantum Information Physics, 2007

NSF DMR-0653377, 9/1/07-8/31/12

S. Barrett, D. DeMille, M. Devoret, S. Girvin, J. Harris, K. Le Hur and R. Schoelkopf

- Designing Novel Superconductors with Oxides

DARPA, US Army (2010)

DARPA W911NF-10-1-0206

PIs: C. Ahn, S. Ismail-Beigi, K. Le Hur and K. Moller (Stanford)

- DOE grant (Department of Energy), 2008

DOE award: DE-FG02-08ER46541, 9/1/08-8/31/11

Karyn Le Hur, *Nonequilibrium Transport in NanoSystems*

<http://www.energy.gov/>

- YINQE (Yale Institute for NanoScience and Quantum Engineering)

2007 Seed Award with J. Harris

the duration was 8/15/07 - 8/14/08

- Startup Funds

Yale University

Canada (2002/2006):

- Regroupement Québécois sur les matériaux de pointe

FQRNT

Fonds Québécois de la recherche sur la nature et les technologies

Regroupement stratégique

McGill, Montréal, Sherbrooke

Date Range: 04/2003 to 04/2009

- Kondo Physics in Artificial Structures

FQRNT

Young Investigator Award

Date Range: 04/2004 to 03/2008

Single PI

- Theory Group Grant

FQRNT

Support to Theoretical Group at Sherbrooke

Date Range: 04/2003 to 04/2007

PIs: C. Bourbonnais, L.G. Caron, R. Côté, K. Le Hur, D. Sénéchal and A.M. Tremblay

- New Opportunities Funds: Special Award
Fondation Canadienne pour l'Innovation (FCI)
MicroFabrication Facility for high temperature superconductors
Date Range: 09/2004 to 09/2005
PIs: Serge Charlebois and Karyn Le Hur

- From Mesoscopic Physics to Doped Mott Insulators
CRSNG or NSERC

Date Range: 04/2002 to 04/2006
Single PI

- Startup Funds
Université de Sherbrooke
Single PI

- Quantum Material Laboratory
FCI, Date Range: 09/2002 to 09/2005
PIs: L. Taillefer and Others
